EC 327 Introduction to Software Engineering

Spring 2026, Prof. Douglas Densmore

Project Contribution Sheet

Name: David DeAcereto
TA: Vugar
Group Name and Project Description (short): KITTI Splat

The goal of KITTI Splat is to be able to recreate a 3D scene from the KITTI driving dataset using 3D Gaussian Splatting. This will involve creating a full Gaussian Splatting pipeline.

1. Please list all group members (including you). Beside each name please give a score between 0 and 5 (0 = did nothing and 5 = exceeded responsibilities).

   David DeAcereto - 5

2. Please rank all group members (including you) from "Most Work Done" to "Least Work Done" (i.e. who did the most coding, debugging, presentation work, etc). **This is an ordered list with NO TIES.**

   1. David DeAcereto

3. Please rank all group members (including you) from "Most Technically Important" to "Least Technically Important". **This is an ordered list with NO TIES.**

   1. David DeAcereto

4. Should any group member not receive as much credit as the other members? If so, why? If so, are you willing to publically confront this person if required (no is ok)?

   Nope. Everyone (me) did equal amounts of work :^)

5. Other comments?

   Just a reminder that this is a solo project which is why I only listed myself :D
